Program Specifics										

  

A. Mission Description and Budget Item Justification

(U) (U) BRIEF DESCRIPTION OF ELEMENT: CALS is an international core strategy to share integrated digital product data through a set of standards to achieve efficiencies in business and operational mission areas. DoD's overarching goal in CALS is to develop a seamless defense enterprise in which the knowledge products of the acquisition process are immediately and rapidly accessible to all authorized users while maintaining near immediate currency and quality of information. This desired state is referred to as the "Integrated Data Environment (IDE)". The IDE (immediate access to quality information) drives many defense-wide and functional-specific reforms and business process improvements. The rapid sharing of information is an implied requisite of Integrated Product and Process Teams, a fundamental process for implementing concurrent engineering and streamlining project management. Digitized information frees logistics support and operator personnel from the burden of cumbersome document or file formats for information processing or presentation – enabling new methods for the performance of maintenance and training tasks based on interactive electronic technologies. This program element is to (1) assess and transition evolving automation technologies into the CALS strategy; (2) develop, maintain and apply to weapon system program office operations an executable business model for the application of CALS and related technologies; (3) integrate technical and functional requirements into a Shared Information Framework of the standards, protocols, procedures, and network management conventions required to achieve compatible implementation of the IDE throughout the international defense enterprise.

  

(U) FY 2000 Accomplishments

- Continue to reengineer logistics processes based on CALS technologies (\$1.005 Million)
- Employ CALS in developing architectures to govern the modernization of integrated supply chain information systems (\$.800 Million)
- Reengineering logistics processes based on CALS technologies and integrate maintenance prognostics and IETM architecture (\$3.278 Million)
- Integrating CALS technologies with dynamic product models (\$.300 Million)

<p>A. <u>Mission Description and Budget Item Justification</u> The Joint Logistics Commanders documented an interoperability requirement for the development and deployment of Interactive Electronic Technical Manuals in a memorandum for the DUSD (Logistics) from Joint Logistics Commanders, 10 June 1997, and assigned responsibility to the Tri-Service Interactive Electronic Technical Working Group. This initiative provides technical support to the working group to accomplish several tasks in support of their mission. Total asset identification and application is not possible electronically without automation of the DoD Type Designation System and development of a link between Weapon Systems and the Federal Logistics Information System. CALs IETM researches into the application of Electronic Commerce and Electronic Data Interchange (EC/EDI) standards for business process application.</p> <p>(U) <u>FY 2000 Accomplishments</u></p> <ul style="list-style-type: none"> <li>• Reengineering logistics processes based on CALs technologies and integrate maintenance prognostics and IETM architecture</li> <li>• Integrating CALs technologies with dynamic product models</li> </ul> <p>(U) <u>FY 2001 Program</u></p> <ul style="list-style-type: none"> <li>• Continue to employ CALs in developing architectures to govern the modernization of integrated supply chain information systems</li> <li>• Continue to integrate CALs technologies with dynamic product models</li> <li>• Reengineer logistics processes based on CALs modernization technologies</li> <li>• Employ CALs in developing architectures to govern the modernization of integrated supply chain information systems</li> </ul> <p>(U) <u>FY 2002 Plans</u></p> <ul style="list-style-type: none"> <li>• Continue to employ CALs in developing architectures to govern the modernization of integrated supply chain information systems</li> <li>• Continue to reengineer logistics processes based on CALs technologies</li> </ul>
